

MISSION

LaserLeap Technologies aims to become an international reference in the transdermal administration of drugs with a differentiated product that makes the skin permeable to drugs in a fast, safe, painless and reversible manner.

VISION

LaserLeap – Your skin, our expertise

VALUES

Satisfaction: of Clients and Other Stakeholders

Safety: of people and processes

Excellence: in providing the service

QUALITY POLICY

The implementation of a Quality Management System (QMS) enables LASERLEAP to ensure the optimisation of its products and services: identifying, planning, executing and verifying the processes required to meet the requirements of its clients and other stakeholders.

The Executive Management defines as guiding principles for our activity the following:

- To meet the needs and expectations of clients and other stakeholders in order to ensure their satisfaction;
- To promote the development of our employees' skills, so that they perform their duties according to high quality standards;
- To develop new applications for the cosmetics market, striving to achieve excellence;
- To pay attention to market demands regarding the identification of new business areas;
- To comply with applicable legal and regulatory requirements for products and services;
- To commit to continuous improvement of the effectiveness of the QMS.
